

Flow control switch – normally open or normally closed contact

- Adjustable switching point
- Low pressure loss
- Reliable under difficult conditions
- For liquid

Product variants described in the data sheet may differ from the product presentation and description.

Type description

The flow control switch is suitable for liquids as normally open or normally closed contact. The switching process is triggered by a reed contact. The flow moves the magnet, which is located on a rocker bar. The switching point is adjustable. The flow control switch works reliably even under difficult conditions with low pressure drop. The switching process is well repeatable.

Other versions on request

Product properties	
Dimensions	Detailed information can be found in chapter "2. Dimensions" on page 3.
Material	
Body	Brass
Rocker bar	PPO (PPE/PA GFN3)
Repeatability	± 15 % (Switching point setting)
Nominal pressure	25 bar ^{1.)}
Operating temperature	Max. +110 °C
Electrical data	
Schaltstrom	Max. 1 A
Schaltleistung	26 VA at max. 230 V AC 20 W at max. 48 V DC
Approvals and certificates	
Protection class	IP65
Product connections	
Electrical connection	Cable plug DIN 43650 Form A

1.) Pressure data: Overpressure with respect to atmospheric pressure
